SELECT THE DISTRESSING AND/OR ANTIQUING TECHNIQUES & THE DISTRESSING LEVEL.

Multiple choices are possible.
The table below shows you which technique is available for formal and country style, as well as the levels of distressing of each technique.

Light = less distressed on the surface.
Heavy = very distressed on the surface.
If no distressing or antiquing is required, please do not tick any of the selections on the form.

TECHNIQUES			FORMAL			COUNTRY		
			LIGHT	MEDIUM	HEAVY	LIGHT	MEDIUM	HEAVY
DISTRESSING	D1	ROUNDED EDGE 	✓				✓	✓
	D2	CRACKING/ SPLITTING 	✓			✓	✓	✓
	D3	WOOD WORMS 	✓			✓	✓	✓
	D4	INDENT 	✓	✓		✓	✓	✓

	D6	CHAIN MARK 	✓	✓			✓	✓
ANTIQUING	AT1	SPLATTER 	✓	✓	✓	✓	✓	✓
	AT2	SHADING 	✓	✓	✓	✓	✓	✓

When we refer to distressing at Jonathan Charles, we refer to the physical application of a variety of different marks or lines on the surface and edges to replicate the natural knocks that an item endures over years of use. Distressing techniques are applied with stones, chains and other tools. Antiquing on the other hand is applied with stains and glazes using brushes and cloth during the finishing process. Examples of this are faint water marks or ink spots, shading at the edges or flecks of stain placed randomly over the surface. Both distressing and antiquing can be applied in light, medium or heavy.

JONATHAN CHARLES

The Transitional & Modern DINING TABLE CREATOR

It's all about your style...

WELCOME TO THE DINING TABLE PROGRAMME

As the world of home furnishing has evolved in recent years individuality and customization have become key components as consumers look to define their own style and distinguish their homes. The home has become an extension of the consumer's personality and reflects their style and values. Recognizing this evolution and seeing an increase in custom requests from our customers, Jonathan Sowter, CEO, started to work on the concept of providing a framework that would allow our customers to build custom dining tables from established styles, shapes, moldings, trims and finishes. Within a matter of months The Custom Dining Program was born. Starting originally with formal traditional styles it has quickly grown to include country and transitional styles as well. The Custom Dining Creator®, as we call our web-based software, allows our customers to build their table on-line with a whole range of possible combinations of taken from existing Jonathan Charles options.

Reaction time and information is key, which is why when the customer completes the web-based custom dining form, we immediately provide a guide price and approximate lead-time*. We even allow the customer to upload a photo or sketch if they cannot quite find what they are looking for in our list of options and within 48-72 hours the customer will receive a drawing of their table.

There are other custom dining programs in the market but none with the breadth of choice and possible permutations offered at Jonathan Charles. Combining the customer's creativity and our craftsmanship the Jonathan Charles Custom Dining Program will result in beautiful unique dining tables and satisfied end buyers.

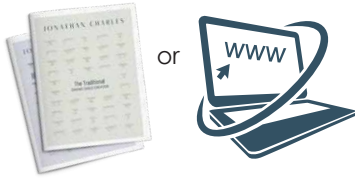

IT'S ALL IN THE DETAIL...
IT'S ALL ABOUT YOUR STYLE...
IT'S CUSTOM DINING CREATOR®

GOOD TO KNOW

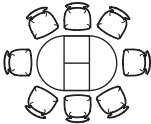

BELOW ARE A FEW GUIDELINES THAT HELP YOU TO CALCULATE THE LENGTH OF YOUR DINING TABLE AND THE NUMBER OF CHAIRS THAT FIT AROUND IT.

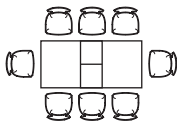

Basic information:

- We use a 22" side chair plus 5" space (= 27") to calculate the number of chairs as shown in the formulas below.
- 1 Leaf = 2 chairs (not applicable for round-to-round leaf)
- Side = Side chair
- Arm = Armchair

FOR ROUND SHAPES: SH2, SH5		
		How to calculate the diameter from closed to open? [DIAMETER closed] + [Leaf size x 2] = [DIAMETER open]
		How to calculate the number of chairs? [DIAMETER] x [3.14/27"] = Number of chairs

FOR ROUND-TO-OVAL SHAPES: SH7		
		How to calculate the diameter from closed to open? [DIAMETER closed] + [Leaf size] = [length open]
		How to calculate the number of chairs? [DIAMETER] x [3.14/27"] + [2 SIDES] = Number of chairs (OPEN)

FOR SQUARE AND RECTANGULAR SHAPES: SH9		
		How to calculate the length open for SH9? [Length closed] + [Leaf size x Number of leaves] = [Length open]
		How to calculate the number of chairs? [Length/27"] x [2] + [2 SIDES] + [2 ARMS] = Number of chairs (OPEN)
